DESCRIPTION

LCD Screen Description

The LCD screen is split into two distinct areas:

The icon area. This is found at the top of the screen. This displays the various system icons which help you to use the telephone.

The main area. This is found across the centre of the screen. It displays the following:

- number being dialled
- caller ID information
- phonebook
- menu information
- in standby mode, handset number and current time

Signal Strength icon
This is always displayed when your telephone is switched on. It shows the current signal strength. More bars indicate more signal strength. If the handset is too far from the base,this icon will blink on the LCD.

Line icon
This indicates that the line is engaged i.e. off hook

Hands-free
This indicates that hands-free is activated

New Call icon
This indicates that you have missed one or more calls

Key Lock icon
This indicates the keys are locked

Battery Status icon
This is always displayed when your telephone is switched on. It shows the level of battery charge. More bars indicate more battery charge

DESCRIPTION

LCD Screen Navigation

The ⬛ **(left side)** key is used to activate the menu.   The 🔴
is used to deactivate the menu and return to standby mode from
any menu.

The ▦ and ▣ keys are used to scroll through the menu.

    ▦ : move backward through the menu

    ▣   : move forward through the menu

The ⬛ **(left side)** key is also used to confirm an action or
choice on a screen.

The ▣ **(right side)** key is used to cancel an action/entry.
If you press ▣ **(right side)** from any menu (except whilst in
number input mode), the telephone returns to the previous screen.
If you press and hold ▣ **(right side)** from any menu (except
whilst in number input mode), the telephone returns to standby
mode.

The telephone will automatically return to standby mode from any
menu if no button is pressed for 30 seconds.

Location

Ensure you situate the telephone close enough to the power socket so that the cable will reach safely without stretching. Also, the mains power needs to be easily accessible in case you need to disconnect the power.

Make sure the telephone is at least 1 metre away from other electrical products e.g.TV, radio and monitors so as to avoid interference.   Also, avoid direct heat and sunlight.

We advise you to place the telephone on a table cloth or similar, as the rubber feet on the base can mark some surfaces

Handset Range

The telephone has a range of 30-50 metres indoors and up to 300 metres outdoors.   The range will be reduced when there is no clear line of sight between the base and handset.   Place the base as high as practically possible to ensure the best signal between the base and the handset.   The ▼ icon at the top left of the LCD display will blink and the signal strength bars will disappear to warn you if you have moved out of range of the base.   You will need to move closer to the base station as the telephone line might be disconnected and the handset will return to standby.

This icon will blink when handset is out of range

HSI 11:58

INSTALLATION

Setting Up

Plug the power cable into the power socket on the base.   Plug the adaptor end of the power cable into the mains supply and switch the supply on. (*)

Connect the line cord plug to the line socket on the base. Connect the other end of the line cord to the PTT socket. (**)

To AC wall outlet
Install the rechargeable batteries in the handset.   The handset requires two Nickel Metal Hydride (NiMH) AAA batteries.   These are supplied with your telephone.   Slide the battery cover in the direction of the arrow and pull it out.   Check the battery polarity diagrams on the handset when inserting the batteries.   Fit the battery cover by sliding the cover on to the back of the handset until it snaps shut.

Place the handset on the base, a short beep will be heard.   The battery symbol 💷 will be displayed on the handset.   Once the handset is fully charged, the display will show a full battery symbol.

The telephone has an automatic charging control to avoid excessive charging.

Before the handset can be used, the handset batteries must be charged for a minimum of 15 hours on the MyDECT100TM base.

(*) Classified "hazardous voltage" according to EN60950 standard
(**)   Classified TNV-3 according to EN60950 standard.

Now available to purchase from www.M2Cshop.com

Battery Use

The ▦ icon is continuously displayed at the top right corner of the LCD display.   The icon indicates the level of battery power. The more bars displayed, the more power available.

▦   ▦   ▦   ▭

When the battery is too weak for the telephone to operate, the handset will automatically switch off.   Place the handset on the base to charge the handset battery.   Under ideal conditions, the handset battery should give about 6 hours talktime or 150 hours standby on a single charge.

HANDSET SETTINGS

On/Off Settings

When the handset is placed on the charger it automatically

switches on.   Alternatively, press 🔟 for about 5 seconds. The telephone will enter subscription mode in which the handset is searching for a registered base.

```
📶          ▭
SEARCHING
```

On successfully finding a base, the LCD window will display the time (either set by yourself – see Handset Settings – Set Date & Time or it will be set automatically when you receive a call provided that you subscribe to a Caller ID service) and the handset number.   The telephone is now in standby mode and is ready for use.

```
📶          ▬
HS1  11:58
```

To turn the handset off, press 🔟 for about 5 seconds again. The LCD display will then switch off.

Note: When battery power is very low, the following is displayed. You must recharge immediately – replace the handset on the base.

```
            ▭
----
```

Now available to purchase from www.M2Cshop.com

Making a Call

Pick up handset.
Press 🔊. ☏ will be displayed on the LCD

When you hear dialing tone, dial the number on the keypad.

To end the call simply press 🔴 or place the handset on the base

Pre-Dialling

Pick up handset. Dial the number on the keypad (up to 32 digits)

Press 🔊, the number is automatically dialled

To end the call simply press 🔴 again or place the handset on the base

Note: If you make an incorrect entry while pre-dialling the telephone number :

- Press C/☒ **(right side)** to clear the last digit and then enter the correct number
- Press C/☒ **(right side)** for more than one second to clear all digits entered and return to standby mode.

Receiving a Call

When an incoming call is received the telephone rings.   If the caller can be identified (due to subscription to a Caller ID service), the caller's telephone number will be displayed.   If this caller's number is stored on the Phonebook, the associated name will displayed

Telephone number

2615042

Press ⬥ .to answer

Or

If auto answer is activated, simply lift the handset out of the base

To end the call simply press ⬥ or replace the handset on the base

Call duration is always displayed once you hang up.

Note: You can alter the ringer volume whilst the telephone is ringing.   Simply use 🔲 and 🔲 to select the desired volume.

USING THE TELEPHONE

Hands Free

You can turn on the speakerphone built into the handset either before or during a call. In this mode there is no need to hold the handset.   You will hear the third party through the speaker and the microphone will pick up your voice.

Before making a call, press 🔊 twice to turn hands free on. The 🔊 icon will be displayed on the LCD.

Press 🔊 during a call to turn hands free on.   The 🔊 icon will be displayed on the LCD.

Press 🔊 again during a call to turn hands free off.   The 🔊 icon will disappear from the LCD.

Note: To adjust the speakerphone volume use Audio Setup in Handset Settings.

Mute Function

If you wish, you can speak privately to someone else in the room with you   without your caller overhearing.
You will still be able to hear the caller but they cannot hear you during the mute operation.

During a call, press C/☒ **(right side)**

The LCD will show **'CALL MUTED'** which indicates that your voice is muted to the call and the caller cannot hear you speaking

Press C/☒ **(right side)** again to resume the coversation. **'CALL MUTED'** will disappear from the LCD display

USING THE TELEPHONE

Receiving Volume

During a conversation, the 🖾 and 🖾 keys adjust the ear piece volume level.   The volume can be adjusted from level 1 to 5.   The selected volume is displayed in the LCD display.   The receiving volume range is 0dB to 12dB.

Last Number Redial

To redial the last number dialled:

Pick up handset.
Press ◐ in standby mode

Press 🔊 to dial the number
Recalling Recent Numbers

You can call back any of the last 10 numbers dialled as follows:

Pick up handset.
Press ◐ in standby mode

Use 🖾 and 🖾 to scroll through the dialled numbers until you find the number you wish to call

Press 🔊 to dial the number
Notes:
- When no numbers are found, **EMPTY** is displayed
- If the redial memory is full i.e. 10 numbers stored, each time you dial a new number, the oldest number stored is automatically erased and the redial memory is updated.

38

Adding Recent Numbers to the Phone Book

Pick up handset.
Press ◖ in standby mode

Use 🔳 and 🔲 to scroll through the dialled numbers until you find the number you wish to add to phone book

Press ⬛/OK **(left side)** to confirm

Press ⬛/OK **(left side)** again to select **'ADD TO PB'**

The display will show **'NAME?'** Enter the name you wish using the numeric keypad (see character map below)

Press ⬛/OK **(left side)** to confirm

The display will show the selected number from the recently dialled list

Press ⬛/OK **(left side)** to confirm

Use 🔳 and 🔲 to scroll through the melody menu to select desired ringer tone.   As you scroll through, the telephone demonstrates the selected melody.   If you want to set a VIP number, you should select a special ring tone. The ring tone should be different from the external ring you have set. You can set up to 9 VIP ring tones associated with 9 numbers

Press ⬛/OK **(left side)** to confirm.   Press 🔴 to return to standby or wait 30 seconds

39

Deleting Recent Numbers

To delete a specific number in the redial memory

Pick up handset. Press ⏻ in standby mode

Use 🔢 and 📖 to scroll through the dialled numbers until you find the number you wish to delete

Press ✎/OK **(left side)** to select

Use 🔢 and 📖 to scroll through the menu to select **'DELETE'**

Press ✎/OK **(left side)** to confirm

You will be prompted to confirm, press ✎/OK **(left side)** again to confirm

USING THE TELEPHONE

To delete all numbers in the redial memory

Pick up handset.
Press ◐ in standby mode

Press 🔳 **(left side)** to select

Use 🔳 and 🔳 to scroll through the menu to select **'DELETE ALL'**

Press 🔳 **(left side)** to select

You will be prompted to confirm, press 🔳 **(left side)** again to confirm

USING THE TELEPHONE

Flash Signal

The ⬛ (left side) key can also be used with special services such as Call Waiting (if provided by your service provider) or transferring external calls to another extension within a private switchboard.   The LCD will display **'R'**.

Paging the Handset

If you wish to locate the handset simply follow the instructions below:

Press 🔘, located on the bottom of the base for less than 5 seconds

All registered handsets will be paged and will ring for about 60 seconds

Press any button on the located handset or press 🔘 on the base again to stop paging mode

Call Timer

Your handset automatically times the duration of every external call.   The time is shown during the call and for a few seconds after the call has ended.

42

USING THE TELEPHONE

Key Lock

When this feature is turned on, all buttons except for ⏏️ will be locked and will not function.   You can use ⏏️ for answering incoming or intercom calls.   When you complete the call and hang up, the telephone returns to lock mode.   This lock feature is useful to avoid pressing buttons by mistake.

Switch lock On: Press ✱ until the 🔒 icon and **`'HS LOCKED'`** appear in the LCD display

Switch lock Off: Press ✱ until the 🔒 icon disappears in the LCD display

CALLER ID

The features described in this section are only available if you subscribe to a Caller ID service from your network provider.

Caller ID means you can see who is calling on your handset display (provided the number is not withheld, unavailable or is an international call).

The display shows **'PRIVATE'** for a witheld number.

The display shows **'OUT OF AREA'** when someone calls from an area where the telephone company is not offering caller identification services or is not yet providing number delivery to your area.

Whether you take a call or not, the caller's details are stored in the Caller ID book. This book stores the last 40 incoming calls.
The 📷 icon will be shown on the LCD if you missed one or more calls.   If the Caller ID book is full, the 📷 icon will blink.

CALLER ID

View Caller ID Book

Press ☎/OK **(left side)** to activate the menu

ADDITIONAL HANDSETS & BASES

The handset that came with your base is already registered to the base (factory setting).   This is registered as handset 1.   Each additional handset you purchase must be registered to the base.

Up to 5 handsets can be registered to one base unit.   This means you can make internal calls between registered handsets, transfer an incoming call between handsets and answer a call anywhere in the office/home at any time as all the handsets will call at the same time.

You can also register up to 4 base units to each handset.   This will increase the phone range, allowing you to move between the telephone coverage areas.

ADDITIONAL HANDSETS & BASES

Register a new Handset

Before registering a handset to the base, you should press and hold the ⊙ key on the bottom of the base for about 5 seconds and then release it.

Press ⬚/OK **(left side)** to activate the menu

Use ⬚ and ⬚ to scroll through the menu to select **'REGISTER'**

Press ⬚/OK **(left side)** to select

Use ⬚ and ⬚ to scroll through the base names list

Press ⬚/OK **(left side)** to select desired base.   The handset will search for the requested base and the relevant information will flash on the LCD.

If the base is found and the handset is successfully registered, you will be prompted to enter the PIN code (the default is 0000).

If the PIN code is accepted, the registration tone will sound and the base assigns a number to the handset. If the PIN code entered is invalid, a warning tone will sound, and the handset will return to the previous registration state.

ADDITIONAL HANDSETS & BASES

Now available to purchase from www.M2Cshop.com

Select a Base

Your handset can be used with up to 4 bases.   See Select Base
in Handset Settings.

Note: In order to use the handset with more than one base unit,
the handset must be registered with each base (see Register a
New Handset section).

Release a Handset

A registered handset can be removed from a base if necessary.
See   Terminate Handset in Base Settings.

ADDITIONAL HANDSETS & BASES

Internal Calls

When using several handsets registered to the same base unit, you can make internal calls and transfer external calls between handsets.

Make an Internal Call

Press ☎

Enter the handset number you wish to page (1-5)
Notes:
If an incorrect handset number is entered i.e. one that does not exist, the handset wil sound an error tone

Receive an Internal Call

The paged handset will ring.   The calling handset number will be displayed on the LCD display **' HS n CALLING'**

To answer, press 📞

To end the call, press ☎
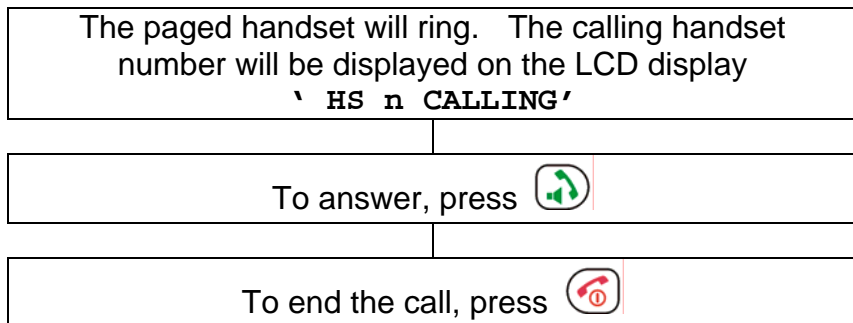

Notes:
If there is an external call during the course of an internal call, the caller's telephone number will be displayed.   The internal call can be finished by pressing ☎.   The normal external call ring tone will be heard, press 📞 to answer the call.

ADDITIONAL HANDSETS & BASES

Call Transfer between Handsets

An external call can be transferred from one handset to another.

During an external call, when you wish to transfer the call. press 📞. Your external caller will be placed on hold

Enter the handset number you wish to transfer to (1-5)

The paged handset will ring. The calling handset number will be dsiplayed on the LCD display **' HS n CALLING'**

To answer the paged handset, press 🎧

If required, you may now speak to the paged user.

To transfer the external call to the paged handset, press 📵
OR
To cancel the call transfer and talk to the external caller again, press 📞

Notes:
On transferring a call, you may hang up before the paged handset answers. The connection between the external caller and the paged handset is complete once you hang up.

If the paged handset does not answer a call within a predetermined time, the call will be transferred back to your handset.

ADDITIONAL HANDSETS & BASES

Three Way Conference Call

When you have both an external call and an intercom call in progress, you can set up a three way conference call

During an external call. press ⌂.   Your external caller will be placed on hold

Enter the handset number you wish to join the three way conference call (1-5)

The paged handset will ring.   The calling handset number will be displayed on the LCD display
' HS n CALLING'

To answer the paged handset, press 📳

The caller can now press ✳ to start the three way call

Either of the two internal handsets can press 📵 to leave the conference call at any time.

CALL WAITING

Caller ID on Call Waiting

When you subscribe to a Call Waiting service from your local telephone service provider, the LCD will display the name and number of the second caller while you are having a conversation with the first caller.

Press ⒠/ⓞⓚ **(left side)** to answer the second caller

When you have finished with the second caller press ⒠/ⓞⓚ **(left side)** again to resume your conversation with the first caller.

Note: If you have transferred an external call to another handset, the call waiting function will nor work via the second handset.

Now available to purchase from www.M2Cshop.com

General Checks

- Make sure that the telephone line cord and adaptor are correctly plugged in and they are not damaged.
- Make sure the batteries are inserted correctly.
- Make sure that the batteries are fully charged.
- Connect another telephone to the telephone PTT socket or move your telephone to another socket to track if the failure is coming from your telephone or your PTT socket.
- Make sure the power adaptor is properly connected

Handset not registering

- See general checks.

No display

- See general checks
- Check the handset is switched on

No connection between handset and base

- You may be out of range of the base. Move closer to the base

Handset on the base does not charge

- Make sure the handset is placed properly on the base. When charging, the battery symbol should be shown filling up.

Handset does not ring

- See general checks
- Ensure the ringer volume is not switched off

No tone when you press

- See general checks.
- Check for the handset number on the LCD display e.g. HS1. If this is not present you must register the handset (see Handset Registration section)

A warning tone is heard during a call:

- The batteries are empty. The handset needs to be replaced in the base in order to recharge.
- You are out of the base coverage area.

Now available to purchase from www.M2Cshop.com

Now available to purchase from www.M2Cshop.com

No number is displayed when the telephone rings:

- Please contact your telephone network provider to get the caller ID service.
- Even if you have subscribed to a caller ID service, if the caller does not want to show their number (private number), the display will show **'PRIVATE'**. **'OUT OF AREA'** might also be displayed if it is an international call
- It could be a call from a PBX. Caller ID may not work properly if the telephone is connected to a PBX.

Consistently short battery life

- Clean the charge contacts
- Replace the batteries

Nothing happens when you press any button

- Check the the keylock is switched off

SAFETY INFORMATION

General

Only use the power supply included with the product.

Only use the approved rechargeable batteries supplied.

Do not open the handset (except to replace the handset batteries) or base. Contact the helpline for all repairs.

Never dispose of batteries in a fire. There is a serious risk of explosion and/ or the release of toxic chemicals.

Do not place objects on the line cord or power cable that may cause damage.

If you are sure you are not going to use the telephone for over a month, remove the batteries.

Cleaning

Unplug the telephone.   Clean the telephone with a soft cloth. Keep the base and handset charging contacts clean. Never use polishes or cleaning agents - they could damage the finish or the electrics inside.

Environmental

Do not expose to direct sunlight.

Always ensure there is a free flow of air over the surfaces of the telephone.

Do not place any part of your product in water and do not use it in damp or humid conditions e.g. bathrooms.

Do not expose your product to fire or other hazardous conditions.

Unplug your phone from the telephone socket during thunderstorms because it could damage your telephone. Your guarantee does not cover thunderstorm damage.

The telephone is designed for working within a temperature range of 5°C to 45°C.

GUARANTEE
